SUMMARY

Technical Product Owner with 9+ years of experience delivering **B2B Marketing Technology, Demand Generation, Content Syndication, Media Platforms, and AI-powered SaaS Products**. At Foundry (formerly IDG)—a global technology media and marketing services company behind leading brands including CIO, Computerworld, and PCWorld—led product strategy and delivery for platforms supporting **content marketing, lead generation, audience engagement, campaign management**, buyer intent intelligence, and marketing operations for some of the world's largest technology vendors.

Experienced in building and scaling **SaaS platforms, REST API integrations, data-driven products, and Generative AI solutions** that improve operational efficiency, content workflows, and customer outcomes. Strong expertise in **Product Strategy, Roadmapping, Stakeholder Management, Agile Delivery, Martech Ecosystems, Marketing Automation, Lead Lifecycle Management, Analytics, and Cross-Functional Leadership**. Proven track record of delivering measurable business impact while leading distributed teams across global markets. **Open to Remote Product Owner, Technical Product Owner, Product Manager, and Martech Product roles** across the US, EU, UK, Canada, and Australia.

Data & Tools: SQL, GA4, AWS, Jira, Confluence, Git, CI/CD, Productboard, Monday.com, Figma

Frontend (Supporting): HTML, CSS, JavaScript, React, WordPress, UI/UX Optimisation

Release & Observability: Release Planning, Risk Management, Logging, Monitoring, Performance Optimisation, NFRs

PROFESSIONAL EXPERIENCE

Technical Product Owner – Platform & AI Systems, Foundry (SSG) | Remote

Mar 2022 – Feb 2026

Foundry (formerly IDG Communications) is the world's leading B2B tech media and data company — publisher of CIO, PCWorld, Computerworld, InfoWorld, CSO, Macworld, Network World, Tech Advisor and 10+ global brands — connecting tech marketers with millions of IT buyers and decision-makers worldwide through media, intent data, content syndication, and demand-gen platforms.

- Owned and delivered **core platform services** supporting **Foundry's global content and campaign ecosystem** — spanning CIO, PCWorld, Computerworld, and other flagship **technology media brands** — used by thousands of technology marketers to run **demand generation campaigns** at scale.
- Translated **marketer and editorial business requirements** into scalable **REST APIs, data services**, and reusable platform components deployed across Foundry's **content syndication** and **digital publishing infrastructure**.
- Defined **API contracts, JSON schemas, and integration patterns** across Foundry's **campaign management, CMS, and analytics platforms**, ensuring **backward compatibility, version control**, and a consistent developer experience across multiple squads.
- Contributed to **SDK design** and reusable platform services that reduced third-party integration effort for demand generation and content syndication partners, accelerating onboarding and improving operational efficiency.
- Built an **AI-driven document enrichment pipeline (PDF → Metadata → Taxonomy → Content Generation)** leveraging **OpenAI, Gemini, and LLM-powered workflows**, reducing manual editorial effort by 60%+ and enabling automated content enrichment across Foundry's campaign asset library.
- Designed **data flows** and **system integrations** connecting **CMS platforms, email marketing systems, campaign management tools, and analytics solutions**, providing real-time visibility into web, email, and **advertising campaign performance**.
- Owned **sprint readiness, backlog grooming, and cross-functional dependency management** across multiple Agile squads; authored detailed **functional requirements, non-functional requirements, and acceptance criteria**.
- Defined **scalability, performance, reliability, and fault-tolerance requirements**; collaborated on observability, monitoring, logging, and performance analytics to maintain enterprise-grade platform stability and uptime.

Product & UI/UX Lead – Digital Platforms Selling Simplified India Pvt. Ltd. | Pune

Dec 2016 – Mar 2022

B2B demand-generation and marketing technology company delivering digital platforms and campaign systems for global enterprise clients across the US, UK, and APAC.

- Delivered Demand Hub, a **multi-tenant SaaS platform** built from 0→1 for **B2B campaign management** and **lead management**, **designing user journeys**, **gated content workflows**, and **lead capture forms** that improved **client conversion rates**.
- Collaborated with engineering on **API integrations**, **backend workflows**, and **system data flow design**; authored **user stories**, **acceptance criteria**, **functional requirements**, and product specifications across the full **product lifecycle**.
- Managed **cross-functional teams** of 8–12 members using **Agile delivery**, **backlog management**, and **sprint planning**; mentored UI/UX teams improving design quality, delivery speed, and release predictability.
- Built **scalable design systems**, **reusable component libraries**, and **responsive HTML/CSS email templates**, ensuring consistency across web, mobile, and campaign platforms for global clients.
- Developed ECM (Email Campaign Manager) — an **email automation platform** featuring **asset hosting**, **user tracking**, **campaign analytics dashboards**, and **customer journey insights** supporting marketing and demand generation initiatives.

Associate Software Developer
Vidushi Infotech Pvt. Ltd. | Pune

Sep 2012 – Mar 2013

- Developed web applications using **WordPress**, **HTML**, **CSS**, **JavaScript**, **PHP**, **MySQL**
 - Supported **frontend and backend integration** workflows
-

KEY PROJECTS

AI-Powered PDF Enrichment Platform

- Built AI pipeline for PDF → metadata → summaries & content generation
- Automated extraction, teaser, and description generation for campaign assets
- Improved content processing efficiency and reduced manual effort

Unified Content Syndication Platform

- Led development of unified platform for web, email, and ad campaigns
- Defined product roadmap and API-driven workflows for scalable campaign execution
- Aligned platform capabilities with business and marketing needs

Demand Hub – Content Syndication Platform (0 → 1)

- Built multi-tenant SaaS platform for campaign and lead management
- Designed user journeys, forms, and gated content workflows
- Improved lead conversion and engagement through UX optimization

ECM – Email Campaign Manager

- Developed email automation platform with asset hosting and user tracking
- Built analytics dashboards for campaign performance and user journey insights
